REMOVAL

RAB VALLEY SITE, Panama, Oklahoma - traveled to Oklahoma City to meet with ODEQ officials to discuss the current status of the site and what steps should be taken to ensure timely implementation of remaining operations. Susan Webster also attended the meeting.

WESTBANK ASBESTOS SITE, LOUISIANA - completed latest FOIA requesting documentation relating to a specific address. The FOIA contractors are not allowed under the newest SOW to view or search files that may be confidential. Therefore, I had to search several joined files and present the findings to the contractor so that hopefully they can extract and redact.

ADMINISTRATIVE- predominately emails and travel.
